Numeracy Placement Screening

A friendly 45-minute check that shows which numeracy level a child should join

1. Instructions for volunteers

1. Say clearly: "This is not an exam. I want to know what is easy and what is new for you." Smile, and sit beside the child.
2. Ask the child to write their name. Write the date.
3. Read each question aloud in Bengali. A child who cannot yet read is not marked down here; reading is checked in the literacy screening (document 02).
4. Do not give hints on the answer. You may repeat the question or point to the picture.
5. Tick every correct item on the scoring table. If a child is upset or gives up, stop kindly and move to a game. It is better to place a child slightly low and move them up than to make them feel they failed.

2. Scoring and placement

The questions are in three groups. Count the correct items in each group. A group is passed when the child gets at least three quarters of its items right (a rule we suggest; your team may adjust it).

Group	Questions	Items	Pass mark	What it shows
A	Q1, Q2 (counting, + and −)	5	4	Ready for Level 2
B	Q3, Q4, Q5 (number names, × and ÷)	8	6	Ready for Level 3
C	Q6, Q7, Q8 (big sums, word problems, shapes)	10	8	Above Level 3: use extension problems

Result	Placement
Group A not passed	**Level 1**
A passed, B not passed	**Level 2**
A and B passed, C not passed	**Level 3**
A, B and C passed	**Level 3 with extension work**

TIP
Q1 (first row) is an example already filled in, so only 2 tree items count. Zero is a real answer: "2 − 2 = 0" checks that the child understands "nothing left".

Scoring table (one per child)

Question	Items	Tick correct	Group
Q1	3 trees (2 to answer)		A
Q2	3 candy sums		A
Q3	2 numbers to words		B
Q4	2 words to numbers		B
Q5	4 times / share items		B
Q6	4 big sums		C
Q7	2 word problems		C
Q8	4 matches		C

ANSWER KEY (VOLUNTEERS ONLY)

- Q1: 3 and 11 (the first row, 6, is the example).
- Q2: 3 + 2 = 5; 4 − 1 = 3; 2 − 2 = 0.
- Q3: 101 = একশো এক; 1258 = এক হাজার দুশো আটান্ন.
- Q4: তিনশো পাঁচ = 305; এক হাজার দুশো বারো = 1212.
- Q5: 3 × 4 = 12; 13 × 7 = 91; 20 ÷ 4 = 5; 63 ÷ 9 = 7.
- Q6: 7890 + 391 = 8281; 240 − 67 = 173; 69 × 12 = 828; 497 ÷ 7 = 71.
- Q7: (a) 7 × 9 = 63 trees; (b) 48 ÷ 6 = 8 toys in each box.
- Q8: triangle – ত্রিভুজ; square – চতুর্ভুজ; slanting line – সরলরেখা; plus sign – যোগ.

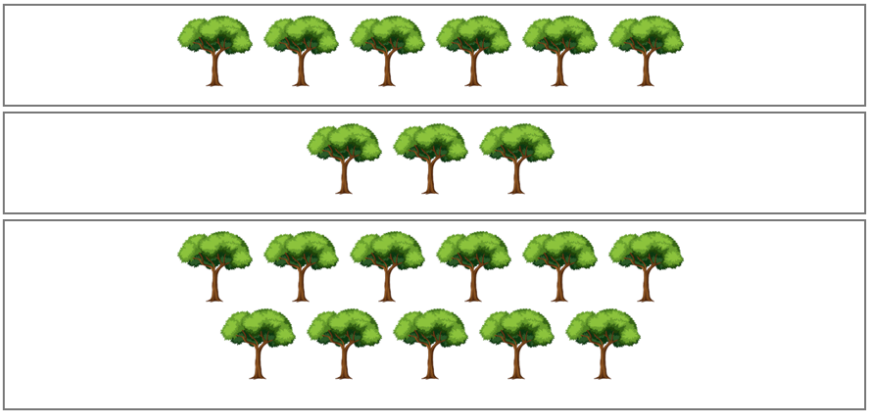

Student worksheet

Name: _____	Date: _____

Approximate time: 45 minutes. (The English lines in italics are for volunteers; children use the Bengali.)

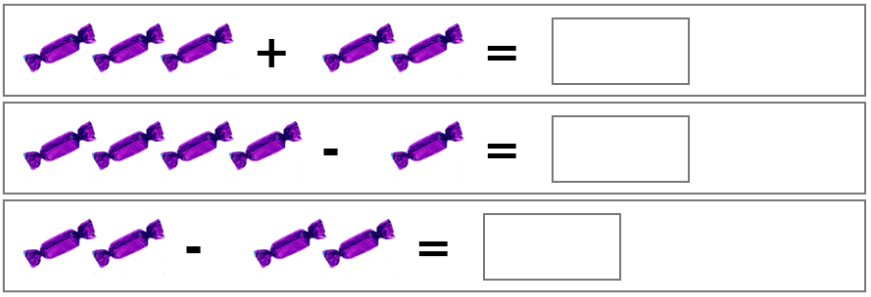

১) কটা গাছ আছে তা গুনে লেখা যাক! (প্রথমটা করে দেখানো আছে।)

1) Let us count the trees and write the number! (The first one is done for you.)

২) যোগ বা বিয়োগ করে মোট ক্যান্ডির সংখ্যা কটা হবে বলো তো!

2) Add or take away. How many candies are there?

৩) কথায় লেখো:

3) Write in words:

১০১ =	১২৫৮ =

৪) সংখ্যায় লেখো:

4) Write in numbers:

তিনশো পাঁচ =	এক হাজার দুশো বারো =

৫) এবার কিছু সহজ গুণ আর ভাগ করা যাক:

5) Now some easy multiplication and division:

৩ × ৪ =	১৩ × ৭ =	২০ ÷ ৪ =	৬৩ ÷ ৯ =

৬) এবার করা যাক কিছু বড় যোগ, বিয়োগ, গুণ, ভাগ:
6) Now some bigger sums (add, take away, multiply, divide):

৭৮৯০ + ৩৯১ _____	২৪০ − ৬৭ _____	৬৯ × ১২ _____	৭) ৪৯৭ (

৭) (ক) একটি মাঠে ৭টি সারিতে ৯টি করে গাছ লাগানো হয়েছে। মাঠে মোট কতগুলি গাছ আছে?
7) (a) In a field, 9 trees are planted in each of 7 rows. How many trees are there in all?

(খ) ৪৮টি খেলনা ৬টি বাক্সে সমানভাবে ভাগ করা হলো। প্রতিটি বাক্সে কতটি খেলনা থাকবে?
(b) 48 toys are shared equally into 6 boxes. How many toys are in each box?

৮) কোন ছবির সাথে কোন লেখাটা যায়, মিলিয়ে লিখি! (লেখা: সরলরেখা, যোগ, চতুর্ভুজ, ত্রিভুজ)
8) Match each picture with its name. (Names: straight line, plus, four-sided shape, triangle)
